Notice of Data Availability and Extension of Comment Period on Environmental Release Descriptions Supporting the Hazardous Wastes Characteristics Scoping Study

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is announcing the availability of the individual facility site profiles associated with the draft report entitled "Hazardous Waste Characteristics Scoping Study: Environmental Release Descriptions." This report, which focuses on environmental contamination resulting from the management of non-hazardous wastes, was made available to the public for comment on September 25, 1996 (61 FR 50295). The draft report itself presents the criteria for the selection of data, the methodologies used to gather the data, and the initial results. However, there was a delay in making available the appendix to the report which contains the individual facility site descriptions because the Agency wanted to allow the affected facilities and states an opportunity to comment on them before they were available to the public. EPA believes that commenters should have additional time to review the individual descriptions in preparing their comments on the draft report and, therefore, is extending the original comment deadline on the report. The report was prepared in support of a study being conducted by the Agency under a May 17, 1996 consent agreement with the Environmental Defense Fund to investigate if there are gaps in coverage in the existing hazardous waste characteristics under the Resource Conservation and Recovery Act (RCRA), as well as the nature and extent of such gaps. The overall study is referred to as the "Hazardous Waste Characteristic Scoping Study."

DATES: Copies of the appendix, which contains the individual facility site descriptions, to EPA's draft report on environmental release descriptions will be available from the RCRA Information Center (RIC) after October 28, 1996. Written comments on both the draft report on environmental release descriptions and the appendix must be received by November 7, 1996 to be considered in completion of the Scoping study. Comments received after November 7, 1996 will be utilized by the Agency in follow-up activities associated with the Scoping study.
